Shows commence at 8.30 p.m.

## CALGARY DODGERS AND THE CROSSFIELD MILLIONAIRES TO MEET IN SEMI-FINALS

The Calgary Dodgers, representatives of Calgary, in the Alberta Amateur Baseball play-off have advanced to the semi-finals and will meet the Crossfield Millionaires in a three game series, and the winners of this series will qualify for the finals against the Southern Alberta Champions.

The Dodgers play here Saturday night, July 27th, and Wednesday, July 31st. If Crossfield wins this series no doubt Cardson will be their opponents in the finals, Cardson have only lost one game this season on their home diamond. The Crossfield team (when in full strength) have not lost a home game. Here's hoping we meet Cardson.

## CROSSFIELD ENTERS SIMI-FINALS BY ELIMINATING INNISFAIL

The Crossfield ball team entered the semi-finals of the Alberta Amateur Provincial Play-off by elimination the Innisfail team here on Wednesday night by winning two straight games of the three game series. The game Wednesday night was interesting from start to finish, although Crossfield took the upper hand from the beginning. Thompson for Innisfail pitched good ball, but the locals touched him for ten hits, counting five runs. Lefty Guertin allowed only three hits and two runs. Mr. Dried, of Calgary, gave entire satisfaction as umpire.

### Preacher Robbed

While driving along the Banff road on Friday, Mr. Dingle of Crossfield, accompanied by Mrs. J. Williams with Grace and Jack, was held and robbed of \$50 by two armed men, about five miles west of Cochrane.

### We Need Thee Every Hour

## What Is a Good Government?

Hon. R. T. Bennett, in addressing a meeting at Stratford, Ontario, recently asked a question, and in answering it, gave a definition of a good government. He said:

"Is it not time that we had a government that would look after the interests of Canadians and Canadians only? You say that is a selfish policy. Ah, my friends, all good governments are selfish and the measure of the goodness of a government is the measure of its selfishness."

Mr. Bennett was, of course, discussing the relative merits of the tariff policies of the Liberal and Conservative parties, and especially so in the light of the impending tariff changes at Washington. These being issues of a partisan character it is not our intention to discuss them, or express any opinion in regard to them. But it is quite in order to analyze and discuss Mr. Bennett's dictum that "all good governments are selfish," and that the measure of the goodness of a government is the measure of its selfishness.

Governments under our democratic system of responsible government are, or should be, but a reflection of the people themselves. They are brought into being by the expressed will of the people and are supposed to give expression in legislation and administration to the wishes of the people. Therefore, if a good government is a selfish government, it follows that selfishness is the sign manual of a good people, and that the selfishness of any people is the measure of their goodness. Do the Canadian people believe this? Are they prepared to accept it as true?

Acceptance of this doctrine would be to deny all the teachings of Christianity. It would be to nullify and reject the Golden Rule. It would set up a standard of conduct for nations and peoples that could have but one result—continued warfare.

If the measure of the goodness of a government is the measure of its selfishness, then a "good" government in Manitoba, Saskatchewan, Alberta, or any of the other Provinces, would be one which pursued a policy designed to advance its own interests regardless of the interests and welfare of any other Province, or of the Dominion, or the Empire as a whole. Such a policy would mean endless friction, constant turmoil, the ultimate smash-up of Confederation.

Suppose, for example, that rightly, or wrongly, the Western Provinces of Canada insisted that their particular interests demanded the complete removal of all customs tariffs, and they refused absolutely to give any consideration to the views, the interests, the welfare of the Eastern Provinces which believe in customs tariffs. What would be the result?

All government is a matter of compromises. No one group of people, no one community, no one province, can selfishly insist upon acceptance of its views and its policies to the detriment of all other groups, communities and provinces. But if selfishness is to be the measure of a good government, then, instance by each group, or community, or province, upon its own views and policies means that any and all compromise will be impossible, and government itself must fail.

Acceptance of Mr. Bennett's doctrine would condemn the governments of Great Britain for many decades past as the worst governments in the world, because it has been the policy of British Governments to adopt policies of unselfishness, to assume heavy burdens and accept great responsibilities in behalf of backward peoples and smaller and weaker nations. Great Britain unselfishly entered the war against Germany in defence of the rights and integrity of Belgium. Following the war Britain waived all debts owing to her by other allied countries, save, and except an amount sufficient to cover her own indebtedness to the United States. These are but two comparatively recent examples of British policy, but it is being exemplified at almost every meeting of the League of Nations. That League, for example, could not exist five minutes if the nations of the world were animated by, and acted upon Mr. Bennett's definition of what constitutes a good government.

The most selfish form of government is an absolute autocracy. How would Mr. Bennett like Premier Mackenzie King to adopt the selfish attitude of Mussolini in Italy, take all powers of government into his own hands, had prohibit any opposition parties from functioning? That's selfishness in government. Is it good? Whatever Mr. Bennett may think, the people of Canada want none of it.

## Suggests Powerful

### Signals For Vessels

Sea Should Be Better Illuminated Says French Writer

A well-known French writer has pointed out that ships have been backward in making use of the great improvements made in modern electric lighting. He states that in this modern age of illumination the sea is the only part of the globe which is plunged into obscurity, and recommends that ships should employ powerful signals like the headlights of motor cars. Undoubtedly the weakness of ships' lighting is a contributory cause to many collisions that occur at night, and the

fuller study of the possibilities of more powerful electric lighting is worthy of the labors of the Conference (the International Conference for the Safety of Life at Sea.)

## Holstein Bull Goes East

The Raymondale Farm, at Vaudreuil, Quebec, recently purchased a Holstein bull from the Canadian Pacific supply farm in Strathmore. This young bull, Strathmore de Winton Matchless, was junior champion last year at Calgary, Edmonton and Saskatoon, although defeated at other shows by his herd mate Strathmore McKinley Fairchild Wayne.

## New 'Plane Is Climber

British Machine Reaches Four Mile Height In Fourteen Minutes

An all-steel airplane that can climb to a height of four miles in less than 14 minutes is the latest addition to Britain's air fleet.

The plane is a single-seater equipped with a super-charger and specially-gearred Jaguar motor developing 400 horse power. With a full load of machine guns and ammunition in addition to electrically heated clothing and oxygen breathing apparatus, it can climb to a height of six miles. Its top speed is 185 miles an hour.

The plane is intended to take off from a home defense aerodrome and to climb rapidly to get above enemy raiding machines as soon as information is received that they have crossed the coast.

## LIFE WAS A BURDEN

Health Restored Through the Use Of Dr. Williams' Pink Pills

"I am writing to express my gratitude for what Dr. Williams' Pink Pills have done for me," says Mrs. W. J. Dowling, Tottenham, Ont., and further says: "I was so badly run down that I felt that life was a burden. The doctor said my trouble was due to poor blood, but his medicine did not help me. My face was yellow, my lips bloodless and at the least exertion my heart would palpitate so violently that I would have to lie down. My feet and legs would swell and cramp, and all my friends thought I was going to die. In this condition I was urged by a friend to try Dr. Williams' Pink Pills. I got the first box and to my delight, by the time I had used them I began to feel better. I got a further supply and kept on taking them. Daily I felt myself growing stronger. The color returned to my cheeks and lips and I felt a new interest in life. To my surprise I can now say that I am feeling fine, for which I give the credit to Dr. Williams' Pink Pills, which I strongly recommend to all weak girls and women."

A useful book, "Building Up the Blood," will be sent free on request by Dr. Williams' Medicine Co., Brockville, Ont.

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail post paid, on receipt of price, six try them today.

## Developing Trade

Increased Travel To The West Indies Follows Inception of New Service

Since the inception of the new service between Canada and the British West Indies, by the R.M.S. Lady Nelson, in December last, the Canadian National steamships' boats have been practically booked to capacity on every sailing. Traffic from Canada to the West Indies has developed tremendously since the inception of the new Canadian National liners, and there has also been an increase in travel from the West Indies into Canada particularly in the summer time when attractive rates give the West Indies business man an opportunity of going to Canada to study the markets there.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only destroy the worms but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

## Horses Live In Zoo

The stable of a London horsekeeper is a zoo, the animals sharing the house with the horses. There are 100 horses in the stable and with them, living contentedly, are two Indian monkeys, a wild hare, a vixen, pig, rabbits, canaries and foreign birds.

A pleasant medicine for children is Mother Graves' Worm Expeller, and it is excellent for driving worms from the system.

## Suspects and Birds

A record kept at Monkidder, France, 1784-1869, of dates of arrival of birds and rainfall reveals a marked relationship to sunspot variation, according to investigations made at the Dominion Observatory, Ottawa. For instance, the cuckoo on the average arrived two weeks later at sunspot maximum than at minimum.

Corn cause much suffering, but Holloway's Corn Remover offers a speedy, sure and satisfactory relief.

## Very Considerate

"I just had" a phone call from Skippy. He's the most considerate boy I ever knew."

"What did he have to say?"

"He wanted to know if I got home all right from the dance he took me to last night."

Keep Mr. Williams' Liniment in the Medicine Chest.

## No Unemployment

### Problem In Iceland

Country Offers Great Opportunities Through Underdeveloped Land

Iceland has no unemployment problem, not because folks have to work to keep warm up there, but because Iceland is an undeveloped land of great opportunities.

The unemployment of Reykjavik totaled eight men on May 1. Six of them were more than 60 years old and in ill health. The other two said they had just left their jobs, and could get better ones.

Iceland, peopled with only 100,000 inhabitants, could comfortably find accommodation and employment for 900,000.

Iceland wants dirt farmers, not men to keep the bright lights of Reykjavik burning. The native Icelanders are good farmers, but not scientific agriculturists.

Government authorities maintain that Iceland could produce far greater quantities of agricultural products than at present, as the soil and climate are excellent for many crops.

## An Important Industry

General Public Does Not Realize Value Of Canadian Fish

The fishing industry is one that rarely receives much attention from the general public, but it is an important and growing industry in this country, as one realizes in scanning the concise items sent out from time to time by the Fisheries branch at Ottawa. We catch them all the way from sardines to whales. For example, we sold \$2,071,000 worth of fish, nearly all times to Australia in that country's fiscal year, 1927-28. In 1928 the value of the exports was \$2,200,000. In May, this year, 20 whales were taken by a company operating from Rose Harbor, B.C. The whales taken off British Columbia are used in production of oil, meal, fertilizer, and are valuable, too, for their whalebone.

## Maintains Its Popularity

Canadian Salmon Still Holds First Place As To Money Value

Canadian fish have won a great reputation abroad, a reputation that shows in accumulating orders on an expanding scale. This country's salmon—for years the most valuable monetary item in the catch—still maintains its popularity.

Cod, which appears to have been the first lure for the hardy European fishermen of the long ago, comes next and the succulent lobster has third place. Sardines are in the swim too; there have been fine orders from the United States and Australia for years for these tasty fish and the trade in them grows.

The Friend Of All Sufferers, Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling aches everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever enquired for.

## Valley Of A Thousand Falls

The name Valley of a Thousand Falls is the Mount Robson District, British Columbia, was bestowed by the Rev. G. B. Klingy, who first visited the region with Dr. A. P. Coleman, and participated in his attempt to climb Mount Robson.

Relieves Asthma At Once. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would realize the remarkable powers of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

## Moose Jaw Tourist Camp

Additional facilities are being provided at Moose Jaw Auto Tourist Camp. Last year about 7,000 people used the camp and the present season is expected to witness a considerably increased attendance.

## Minard's Liniment for Rheumatism.

Farm Planning Town planning in Alberta is now being extended to include farm planning. The farmer may secure expert advice concerning the plans for his house and barns, and the lay-out of his farm.

# SHIELDED against HEAT and FRICTION

Just as the cobbler waxes his thread to make his stitches hold as long as the shoe leather lasts, so Firestone saturates with pure liquid rubber, every fibre of every strand that goes into the tire, to make the cords resist internal heat, friction and strain as long as the tire lasts.

This extra patented Firestone process gives Firestone Tires the extra strength and stamina to give "Most Miles Per Dollar".

See your local Firestone Dealer.

# Firestone TIRES

## Eliminating Level Crossings

Will Take Time But Find For This Purpose Is Available

It is to be recognized that \$200,000 a year will not make for very rapid progress in eliminating the many hundreds of level crossings in Canada, but this fund, known as the railway crossing fund, at least offers opportunity for gradually getting rid of some of the worst of these death-traps. Dr. S. J. MacLean, assistant chief commissioner of the Dominion Office of Railway Commissioners, has drawn attention to the existence of this fund and suggests that it be availed of in Saskatchewan.

Dr. MacLean has pointed out that the sum of \$200,000 is voted annually by Parliament for the elimination or improvement of railway crossings, and this sum is at the disposal of the Railway Board to distribute as it sees fit. Alberta has recently been granted a considerable amount, and Manitoba has also taken advantage of the fund. Manitoba, in fact, in co-operation with the Railway Board, has done good work in getting rid of some dangerous railway crossings. This has been done by some minor changes in roads and highways, making it unnecessary to cross railway tracks.

Some day the authorities may undertake to eliminate every level crossing in Canada, but, on account of the huge expense that would involve, the time appears a long way off. Meanwhile a good deal can be accomplished by the means outlined, and Dr. MacLean's suggestion ought to be widely considered.—Regina Daily Post.

## Canadian Teachers' Federation

1930 Convention Will Be Held At Edmonton

The selection of the venue for the 1930 convention of the organization, the election of the executive committee and the adoption of a number of resolutions comprised the final business transacted at the closing session of the tenth annual conference of the Canadian Teachers' Federation at Quebec.

Edmonton, Alberta, was chosen for next year's conference at a date to be decided later by the executive committee.

The following members were elected to the executive committee of the federation: G. H. Ford, New Westminster, B.C.; A. J. Powell, Ford, Sask.; J. R. Mackay, Saskatoon, Sask.; A. E. Heard, Winnipeg, Man.; J. E. Robertson, Toronto, Ont.; Miss L. E. Brittain, Montreal, Que.; Miss C. Ricker, West St. John, N.B.; J. A. D. Good, Truro, N.S.; and C. B. Jelly, Summerside, P.E.I.

## Caution Is Necessary

Motor Drivers Should Use Heads As Well As Horns

"Use your horn! That's what it's for," is the sound advice of a traffic authority to motorists. He urges them not to steal up behind the unsuspecting pedestrian or pass another vehicle from the rear without giving some signal. "Get the horn-blowing habit," is the suggestion. But drivers should also be urged to use their heads, or what are supposed to be heads. Horn-blowing should not take the place of caution. A blast of the horn neither entitles the blower to the right-of-way nor guarantees him a clear path.

Water: What'd be matter with dat egg, boss?

Diner: It was served too late to be good egg and too soon to be good chicken.

Minard's Liniment for Earache.

## Denied Entrance To States

Young Toronto Inventor Claims He Has More Powerful Substitute For Gasoline

Denied entrance into the United States even for an hour, during which time he had expected to lay his invention before officials of the General Motors Corp., Jack Star, 197 Grace Street, Toronto, claims that he has a lighter and more powerful substitute for gasoline.

Mr. Star is a comparatively recent arrival in Canada, his name in Europe being Jacob Starselski. He is a former racing motorcyclist, and said he had been working on his formula for nine years and had visited Europe, Asia and the continent in search of sources of supply. He carries credentials from Sir Herbert Samuel, British commissioner for Palestine, Mustapha Kemal Pasha and other notables. His researches have involved great expense and long study, he says, and he is working now to obtain world patents on his discovery. He declares he had made arrangements with Frank J. Kinzinger, attorney, of Detroit, to assist him. He was denied entry to Detroit, however, for an hour, although he had offered to leave his car with the authorities at the ferry dock.

## New Kind Of Festival

Distribution of 100,000 toothbrushes to children in the primary public schools of Chile will be a feature of the "toothbrush festival" to be held throughout the Republic next fall under the auspices of the Chilean Ministry of Education.

The blood absorbs about two pounds of oxygen daily.

It isn't the girl who fires up quickly that makes the best match.

# Are You Ready

# When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most of the physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed. Castoria is just a matter of moments. Yet you have eased your child without use of a single doubtful drug. Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot put away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea; effective, too, for older children. Twenty-five million bottles were bought last year.

**Fletcher's CASTORIA**

# Sour Stomach

Just a teaspoon dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excessive acidity. Each bottle contains full directions—no directions.

You are happy again in five minutes. Don't depend on crude methods. Empty your last way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excessive acidity. Each bottle contains full directions—no directions.

## GERMANY TO ACT AS INTERMEDIARY IN EASTERN CRISIS

Berlin.—The German government has agreed to take over the interests of China in Russia, and Russia in China, for the period in which direct diplomatic relations between those countries remain disrupted. It was emphasized on all sides that this was a certain indication of the administration of the Chinese Eastern Railway.

Requests for its good offices came to the foreign office from Russia through the German ambassador at Moscow, and from China, through the legation of that government here.

The break between Russia and China over the Manchurian situation has become a diplomatic activity with the German government's agreement take charge of Russian interests in China and Chinese interests in Russia.

Nanking.—Formal notification of Russia's decision to cease relations with China was received at Nanking in a second note from Moscow, which carried out the warning of the first Russian note of July 13.

President Chiang Kai-Shek summoned an emergency conference of Nationalist government leaders to consider the Manchurian question, after receipt of a telegram from Governor Chang Hsueh-Liang that "the situation is extremely grave" in view of Russian troop concentration along the frontier.

The Nationalist government had apparently not lost hope of reaching an amicable settlement with Russia. Japan was possibly prepared to intervene between Russia and China in the interest of peace in the Far East. Premier Hamaguchi and Foreign Minister Shide Hara, while not "officially" informed of developments, conferred on the situation as conveyed in the press reports.

Moscow newspapers continued strong disapproval of the Chinese reply to the original Russian note.

### Seattle Water Front Fire

Union Pacific Dock Is Completely Destroyed By Flames

Seattle.—In Seattle's biggest waterfront fire since 1914, the Union Pacific dock was completely destroyed, with damage estimated at \$1,000,000. Six injured firemen were recovering from burns and suffocation at the Providence Hospital.

The fire started beneath the flooring on the Bay end of the dock. Apparatus was drawn from twenty stations to fight the blaze, and traffic stalled on business streets while engine and truck companies roared down Seattle's hills to the dock. The city's three fire boats were also called out.

### File Incorporation Papers

Three Montreal Spinners Form Corporation With \$20,000 Capital  
Sacramento, Calif.—Three spinners, so they declared, of Montreal, Province of Quebec, Canada, have filed articles of incorporation with the Secretary of State Frank C. Jordan. The papers entitle them to engage in any kind of business from building railroads to publishing newspapers under the name of the Plaza Service Corporation, on a capital of \$20,000.

The young ladies who legally admit they are spinners, are Misses Ella Doloreux, Bertha Cornier and Jessie Dickson.

### Will Rescue Stranded Albatross

Ottawa, Ont.—The department of marine has made arrangements to have the Canadian government vessel "Acadia" call at Port Burwell in about ten days and take off the Chicago flyers who are stranded there following the destruction of their plane. The "Acadia" will take the flyers to Fort Churchill.

### Four Die In Fire

Cornwall, Ont.—Explosion of a coal-oil stove is believed to have caused a fire which swept five residences on Guy Street, East Cornwall, causing the death of four persons who were trapped in the burning building and injuring four others. Property loss is estimated at \$25,000 to \$30,000.

### Expect Larger Apple Crop

Ottawa, Canada will have a big apple crop this year. The commercial crop is expected to be 11 per cent. greater than last year and 21 per cent. greater than the five-year average with a total of 3,609,417 barrels.

W. N. U. 1795

## London-Paris Electric Railway Is Planned

Scheme Would Employ Fifty Thousand Men For Ten Years

London, Eng.—The Observer says that the committee on English channels and communications, which will report late this year probably will outline plans for an electric railway from London to Paris at an estimated cost of \$800,000,000.

The reported plan calls for a road which it would take 50,000 men ten years to build.

The plan contemplates twin tunnels under the English channel. The Observer said, each 23 feet in diameter and 44 miles long. The line would use a railway track on a seven-foot gauge.

Tremendously powerful electric locomotives would be used to haul trains from London to Paris in the rapid time of 2 hours and 45 minutes, if the plan outlined by the newspaper is carried out.

### Will Head New Bank

Hon. Sir Robert Borden Elected President of Barclay's Bank, Canada

Montreal.—The Right Hon. Sir Robert Borden, former prime minister of Canada, was elected president of Barclay's Bank, Canada, at the first meeting of the shareholders.

Sir Robert will assume his new duties on September 3, when the bank will commence business. Arthur B. Purvis was elected vice-president and J. R. Booth was appointed manager.

In addition to Sir Robert and Mr. Purvis, the following were elected to the board of directors: Hon. L. A. Taschereau, premier of Quebec; A. A. Magee, W. O. Stevenson, H. P. Alton, and J. S. Crossley.

### Lower Potato Crop

Canadian Average Shows Five Per Cent. Decrease From 1928

Ottawa.—The Canadian potato acreage indicates a five per cent. decrease from 1928 figures, with 568,000 acres as compared with 599,603 acres last year. Western provinces report practically the same acreage while Ontario, Quebec and the Maritimes all report slight to fairly heavy decreases. In British Columbia a good crop is expected. In the prairie provinces dry weather conditions are creating fears that the potato crop will be light this year.

### Defert Driving Golden Spike

Ottawa.—The golden spike which will mark the completion of the Hudson Bay Railway will not be driven this year after all. Chief Engineer Czwolki, of the Canadian National Railways, has returned from an inspection of the railway and reports that a million yards of ballast must still go down and it will be October before this work can be carried out. It will be 1930 before the railway can be considered as completed to tidewater.

### No Cause For Alarm

Edmonton.—General conditions in the west do not give cause for any alarm over the danger of unemployment this winter, was the opinion expressed by Hon. Robert Forke, federal minister of immigration, on reaching here from the East. He was accompanied by W. J. Egan, deputy minister, and had on his program an immigration conference with the provincial government.

### Grain Board Appointment

Ottawa.—The appointments in connection with the re-organization of the grain board will not be made until the first August meeting of the Dominion cabinet. Hon. James Macdonald, Minister of Trade and Commerce, made this announcement. The minister declined to intimate how many of the present board would be replaced by new men.

### Many Students From West

Kingston, Ont.—Queen's summer school, in progress now, attracts students from all parts of Canada. Saskatchewan sends 23, Manitoba 3, Alberta 8, and British Columbia four. Two are from the United States and one from China. Canadian history is strongly emphasized. The students enjoy the historic places in Kingston and the use of Queen's library.

### B. C. Fire Losses Higher

Vancouver.—Fire losses in British Columbia during 1928 amounted to \$2,667,564, against \$2,822,005 in 1927, showing an increase of more than forty-four thousand dollars, according to the annual report of J. A. Thomas, provincial fire marshal.

## Had Miraculous Escape

Vancouver Salesman Pinned Under Interurban Car Had Hand Injured

Vancouver.—Charles Kinsburgh, aged 60, a Vancouver salesman, was pinned for more than a half hour in his demolished touring car under a big steel British Columbia electric interurban car, but escape with a bruised hand. The interurban had to be jacked up before he could be released.

Kinsburgh was driving across the intersection when the interurban crashed into him, overturned his car and ran up on top of it. Although the electric car was crowded, no one on board was injured.

Kinsburgh was imprisoned in the driving seat of his automobile with only his head and shoulders visible. Police squads, railway employees and ambulance men laboured feverishly to extricate him, but without success until a large jack was brought and the interurban lifted. The imprisoned man directed the operations, although suffering agony because of the manner in which his hand was caught. After his release it was found at the General hospital that he had suffered no other injury.

## RUSSIA BREAKS OFF RELATIONS WITH CHINA

Moscow.—Russia has broken off diplomatic relations with China.

The Soviet government made public its reply to the Chinese note, the latter having come in response to an ultimatum from Russia. In this note the Soviet Union said that all means of reaching an amicable settlement had been exhausted.

The note placed the entire responsibility for all consequences upon the Chinese government. It announced also that all Soviet diplomatic and consular officials and all government commercial representatives would be recalled at once from China.

It further declared that all Soviet officials would be recalled from the Chinese Eastern Railway; that all railway communications between Soviet territory and China would be suspended, and that the diplomatic and consular representatives of the Nanking government would be ordered immediately to leave the Union of Soviet Socialist Republics.

The Russian action in breaking off diplomatic relations with China came at the expiration of time set in an ultimatum which the Soviet Union dispatched to the Central Republic headquarters on July 13. That ultimatum gave the Nationalist Government at Nanking three days in which to rescind its action in seizing the Chinese Eastern Railway in Manchuria.

It also demanded restoration to office of the Russian officials who had been deposed from their places in the railway and the liberation of all Russian nationals who had been imprisoned. By the terms of the ultimatum, the closing of Russian institutions in Manchuria, such as banks, railway unions, and business syndicates was also to be rescinded.

### Revisit Scene of Exploits

Left to right they are James Stephens, C.P.R. pensioner; and Tom Wilson, discoverer of Lake Louise in the early eighties. The photograph was taken recently at Banff. Mr. Stephens, who now lives at Oak Lake, Man., was astonished at the changes at Banff since he first saw the place fifty years ago. Then it was all virgin forest; nowadays it has a first-class hotel and what were rough tracks through the timber are

### MAKING TOUR OF CANADA

Rev. W. C. Poole Christie, Church, Westminster, president of the World Sunday School Association, who is making a tour of Canada.

### Canada Wins Kolapore Cup

Eight Marksmen Recapture Famous Trophy Lost Last Year

Bisley Camp, Eng.—Canada won the Imperial Kolapore Cup. Eight marksmen picked from the Canadian Bisley team recaptured the famous trophy Canada lost in 1928, by a margin of 33 points over the Mother Country, with India, Guernsey and Jersey following in that order.

The Canadian team aggregate was 1,083, while the Mother Country aggregated 1,050. The cup was shot for at three distances, 300, 500, and 600 yards.

Canada had gained a lead of 18 points at 300 yards. At the 500-yard distance their team aggregate had reached 729 points to 703 for the Mother Country.

The standing of the five contesting countries at the 300-yard distance, first of the three ranges, was: Canada, 360; Mother Country, 342; India, 336; Guernsey, 333; Jersey, 325.

### Churchill Coming To Canada

Former Chancellor Of Exchequer Will Visit Alberta Oil Fields

Calgary, Alta.—Rt. Hon. Winston Churchill, former chancellor of the exchequer of Great Britain and occupant of other important cabinet posts in the Old Country will visit Calgary for three days in August. He will arrive late on August 24, and will remain until August 27. He will then proceed to Banff for a brief visit before going to the coast. This information was received through private sources.

He will visit Turner Valley oil fields and possibly some of the coal areas in the Calgary district.

### Torrential Rains In India

London, Eng.—Exchange Telegraph dispatches from Bombay said widespread floods were reported in the Sind division of that province. At Sukkur Barrage the entire township has become submerged, with 12 deaths. In Middle Sind hundreds of cattle died from exposure in torrential rains. Miles of desert have been transformed into a huge lake.

### Winnipeg—Not more than 25 per cent of the harvest help that hustled westward to the prairie provinces last summer to assist in harvesting a bumper crop will be required this year to clear a comparatively small showing of grain, a promising crop indeed last spring, but one that has suffered from the ravages of a bailing sun, continuous waves of intense heat and lack of moisture.

Where a force of 50,000 husky young men from Eastern Canada augmented by several thousands young Englishmen brought overseas for the purpose, were put to work last year harvesting thousands of acres of wheat, probably 10,000 and certainly not more than 15,000 will be sought to work in the west's heat-stricken fields next month.

This was an estimate given recently by J. A. Dowman, general superintendent of employment for Manitoba, when interviewed by the Canadian Press.

The unemployment situation throughout the west is not considered serious, in the opinion of Mr. Bowman. Hundreds of men are working in Winnipeg and other centres at the present time, he said, but the situation was not at all unusual.

No difficulty is anticipated by the Manitoba unemployment bureau in placing hundreds of available men now here when harvesting gets under way.

He added that only a small number of outside help would be needed if the dry weather that is now prevailing in all three prairie provinces continues for another week.

## Government Is Powerless

Cannot Refuse Clearance To Liqueur Boats Under Present Law

Ottawa.—The matter of refusing clearances to liquor-laden boats destined to the United States is not within the competence of the federal government as the law stands at present, nor can it come within that competence until authority for such a course has been given by act of parliament.

This was the statement of Hon. W. D. Euler, minister of national revenue, in an interview. "I adhere to the sentiments expressed on that subject last session, and I am convinced that subsequent developments have borne them out."

### Reviews Boy Scouts

Premier King Addresses Contingent Going To International Jamboree

Ottawa.—Canada's Boy Scouts contingent to the International Jamboree opening at Arkhamstead, England, on July 27, was reviewed on Parliament Hill by Premier W. L. Mackenzie King. Later, addressing the Boy Scouts and leaders—representative of every province of the Dominion and the Yukon Territory—in the Hall of Fame, in the parliament building, the Prime Minister made an inspiring appeal to the youth of this country for a full realization of citizenship in this Dominion and in the Empire.

### Postpones Atlantic Flight

Unlikely That Costs Will Make Attempt This Year

Paris.—It appeared improbable here that Deudonne Coste will make another attempt to fly across the Atlantic this year. He has not abandoned his plan, but when asked when it might be carried out he replied laconically: "There is no hurry." The backers of the flight, who have the aeroplane and its motors, have been silent concerning a new attempt, which gave support to the growing belief that it was not likely to be in 1929.

### Berlin-London Television Service

London, Eng.—Within two or three months a telegraphic transmission service for photographs, pictures and similar matter will be opened between London and Berlin for the general public. The announcement was made in the House of Commons by Hon. H. B. Lees-Smith, postmaster-general.

### Preparing For Trip

Friedrichshafen, Germany.—Dr. Hugo Eckener has stated definitely that the next flight of the dirigible, Graf Zeppelin, to the United States, has been planned for the first week in August, but that the date has not yet been fixed.

## WILL REQUIRE LESS HARVEST HELP THIS YEAR

Winnipeg.—Not more than 25 per cent of the harvest help that hustled westward to the prairie provinces last summer to assist in harvesting a bumper crop will be required this year to clear a comparatively small showing of grain, a promising crop indeed last spring, but one that has suffered from the ravages of a bailing sun, continuous waves of intense heat and lack of moisture.

Where a force of 50,000 husky young men from Eastern Canada augmented by several thousands young Englishmen brought overseas for the purpose, were put to work last year harvesting thousands of acres of wheat, probably 10,000 and certainly not more than 15,000 will be sought to work in the west's heat-stricken fields next month.

This was an estimate given recently by J. A. Dowman, general superintendent of employment for Manitoba, when interviewed by the Canadian Press.

The unemployment situation throughout the west is not considered serious, in the opinion of Mr. Bowman. Hundreds of men are working in Winnipeg and other centres at the present time, he said, but the situation was not at all unusual.

No difficulty is anticipated by the Manitoba unemployment bureau in placing hundreds of available men now here when harvesting gets under way.

He added that only a small number of outside help would be needed if the dry weather that is now prevailing in all three prairie provinces continues for another week.

## ANNOUNCE NAVAL DISARMAMENT TERMS SHORTLY

London, Eng.—A full statement on naval disarmament negotiations between Great Britain and the United States may be made in the House of Commons before the Parliament rises at the end of July, Prime Minister Ramsay MacDonald announced.

The Premier said he was doing his utmost to expedite the negotiations but that he was not certain the statement would be forthcoming.

Besides discussing disarmament, the House of Commons heard from the Right Hon. J. R. Clynes, Home Secretary, just why Leon Trotsky, exiled Bolshevik, wasn't permitted to enter England.

Right Hon. Winston Churchill, as energetic and insistent in opposition as he was a leading cabinet minister, fairly prodded the Laborite Premier into a disarmament statement.

Premier MacDonald characterized as "a most unworthy suggestion" a question by Churchill whether it was to be understood that "a most grave and important decision of this kind is being withheld until parliament has separated." The Premier explained that it was obvious the question was not in his hands alone, that a very complicated set of circumstances existed and that when one dealt with international affairs it was not with a cabinet or a department alone.

"I hope the cabinet will not ask me to tie my hands," he added. In a statement regarding Trotsky, Mr. Clynes disclosed that the British Government feared the difficulties that might arise in securing the fallen Bolshevik's leader's departure from Britain if his presence should become embarrassing.

In some circles in Britain it has been felt that the manner of Trotsky's application for admission to England was ill-advised. He made the request immediately after the Labor Government came into power, expecting his sympathy for the new administration. At a time when their critics were searching for every opportunity to embarrass them, Labor leaders were most careful to make no gesture toward Trotsky which might be misinterpreted.

The question of the attitude of the Dominions toward resumption of diplomatic relations between Great Britain and Russia was again dealt with in parliament, when members pressed for more information on the correspondence between Britain and the Dominions.

### Received By Prince

Professor W. L. Carlyle Visits His Employer At St. James's Palace  
London, Eng.—Professor W. L. Carlyle, manager of the "E.P." ranch at High River, Alta., was recently received by the Prince of Wales at St. James's Palace.

Nothing was said as to the conversation between the Prince and his ranch manager, but undoubtedly his royal highness evinced a keen desire to know how the ranch was progressing. He has often intimated he was looking forward to another visit to the ranch.

### May Avoid Ontario

United States Tourists Complain About Police Discrimination

Windsor, Ont.—Aroused by complaints of police discrimination in Ontario against United States tourists, the Detroit Automobile Club has sent out a circular of warning to all tourist bureaus on highways leading to Ontario. It was reported by Richard Harris, managing secretary of that organization. The Detroit Club has suggested use of the all-American route to the east so as to avoid Ontario "if the tourists want to be sure of fair treatment," he said.

### Northcott Will Appeal

San Francisco, Cal.—Counsel for Gordon Stewart Northcott, convicted slayer of little boys on his Wineville "murder farm" were ordered to file briefs on his appeal before August 5, by the state supreme court. Northcott is under sentence of death and his mother is serving a life term in San Quentin for participating in the same crime.

### Poland Honors Aviator

Warsaw, Poland.—The Polish schooner Iskria will bring the body of Major Ludwik Jozefowski back to Poland, where honors will be paid. Religious ceremonies have been held throughout Poland in memory of the aviator.

## New Departure In Finance

Large New York Bank Saves Small Borrowers From Loan Sharks

When a bank finances a corporation with millions of dollars, that is not news. But when the same bank throws its resources behind John Smith's unpaid doctor bill, that is a new departure in finance. The National City Bank is doing just that, taking care of such bills for worried people who are not even depositors, shouldering their financial burdens in a way that is saving thousands from the loan sharks.

In a year, 50,000 persons have received loans from the bank, and 97 per cent. of them have made good on their payments. The loans averaged only \$320 each and were nearly all made to small wage-earners.

Statistics compiled from the first year's experience indicate that the average borrower is thirty-four years of age, has been in the same position steadily for more than five years, earns \$2,750 a year, is married and has one child. He has got behind on his rent, his insurance, his doctor bill, payments or improvements on his house, or some such personal emergency. He needs a little money badly for a short time, and is glad of a chance to borrow at 5 per cent. from a bank, rather than from friends and relatives, and to pay it back by small weekly or monthly payments extended over a year.

One of the first applicants for a loan was a man who had a year before, been compelled to borrow \$1,000 to meet expenses in connection with the long illness and death of a daughter. He secured this loan from a small loan association of business associates at a prohibitive rate of interest—100 per cent. Able to pay only \$20 a week, at the end of a year he had paid a full \$1,000 but still owed the principal, and was in despair. Borrowing \$1,000 from the bank, he was able in 1928 to get free from this debt.

Loans are not made for luxuries. Thirty per cent. of the loans made to date have been for medical, dental and hospital service, 15 per cent. to pay debts, and 11 per cent. to meet payments on homes.

One feature of this loan service that is comforting is that each borrower is insured, without cost to himself, for the full amount of the loan, so that, in the event of death, neither the co-makers of his note nor his family has to finish the payments due.

## Had Curious Experience

English Motorists Recently Saw Strange Mirage On London-Southampton Road

One of the strangest phenomena ever seen on English roads was witnessed by thousands of motorists. For mile after mile extraordinary mirages danced before the eyes of drivers. "Have you seen the mirage?" was the question wherever motorists met. Driving along the main road from Southampton to London between noon and 1 p.m. writes a correspondent, was a curious experience. In the hot sun, a mirage what appeared to be lakes of water lay every few hundred yards, only to fade away as the car approached. Traffic took all sorts of fantastic shapes. Some cars looked as though they were travelling in the air.

"Three months ago I caught a fish that weighed 40 pounds. I don't remember just when it was exactly now."

"July."

"No, sir. I was telling the exact truth."

"Men who travel a great deal seldom marry" says an explorer. In other words a rolling stone gathers no moss.

Thirty-seven miles of carpet were laid on the floors of a modern hotel recently erected.

"You are quite drunk."

"I know I am, but it will soon pass off. But you are a fool, and that will not pass off."—Hummel, Hamburg.

W. N. U. 1795

## Rural Nursing

Need For More Hospital Beds, Doctors and Nurses in Isolated Areas

No one orthodox plan of rural health nursing can be laid down and universally accepted as the ideal type of health organizations for all non-urban Canada, because of the wide difference in conditions found in so vast a land. Miss Elizabeth Smellie, chief superintendent, Victorian Order of Nurses for Canada, stated in an address on rural nursing from the viewpoint of the public health nurse, at the International Nurses' Congress in Montreal. The full co-operation and combined wisdom of provincial governments, directors of training schools for nurses and the leaders in public life were needed to secure the best distribution of available physicians and nurses, she stated.

Miss Smellie's paper on rural nursing in Canada brought out the need for more hospital beds and more doctors and nurses for isolated areas. "This means larger government appropriations for health purposes to pay adequate salaries," she said, "to ensure professional attention for people requiring it but possibly unable to pay for it, or beyond the reach of it."

Other suggestions for the improvement of conditions in rural communities put forward by the speaker were representations by a public health nursing group on the Dominion Council of Health, the continued use of the health unit plan, more full-time officers of health, and better living arrangements for rural nurses.

## Leaves Son One Dollar

Chinese Father Reverted Neglect During His Old Age

Chinese ethics on filial obligations—the duty of a son to his father, according to Oriental ideas—were cited by Chin Man Duck, formerly of No. 9 Pell Street, New York, who, his will was filed for probate in Surrogate's Court, Chin died Jan. 9, 1929, in a New York hospital.

"I leave my honored son, Chin Hing," said the document, "only the small amount insignificant sum of \$1 American, because he was undutiful to me as a son, and neglectful of me during my old age."

Referring to his other son, Chin Jung Dot, of No. 9 Pell Street, in glowing terms the father made him a bequest of \$1,500, which is the residue of the estate, intrusting to his care his wife, Ng Shee, and three other sons, Chin Jung Gu, Chin Jung Ming, and Chin Jung Gwak, all of Lin Far On, Kwangtung Province, China.

"I know," says the decedent, "that Chin Jung Dot will provide for them, faithfully as he has all the pride of his honorable ancestors."

## Totem Pole For Rideau Hall

Presented To Lord Willington By Indians At Friendly Cove

Before proceeding to Friendly Cove, Nootka, to remove the totem pole which the Nootka Indians presented last year to His Excellency the Governor-General, T. B. Campbell, Canadian National Railways engineer, known throughout Western Canada, as "Totem Pole" Campbell, because of his work of restoring totem poles for future generations of Canadians and visitors to Canada, spent a week-end at Jasper Park Lodge. The Indians at Friendly Cove, he stated in an interview, through their chief, Captain Jack, had presented Lord Willington with a magnificent totem for Rideau Hall, and it was now the engineer's task to uproot it and prepare it carefully for its long trip across the Dominion. Friendly Cove was where the famous Captain Cook landed during his voyage along the Pacific Coast.

## Canadian Police Forces

The police forces in Canadian cities are of high calibre. There have been comparatively few cases of unfaithfulness to trust recorded in their annals. They are men of integrity. They bring to their duties a high sense of responsibility to the public they serve and protect, and it may be added, the character and achievements of any force depend largely on the chief constable.—Calgary Daily Herald.

## Aerial Photography In 1928

During the 1928 season, 88,000 aerial photographs of areas in different parts of Canada were taken by the Royal Canadian Air Force for the Topographical Survey, Department of the Interior. Of these, 17,000 were oblique views and the remainder vertical views.

"This is a heck of a drug-store," we heard a man remark when told by an obliging clerk that they didn't stock lawn-mowers.

## New Director

W. J. Blake Wilson, of Vancouver, Vice-President and Director of the Canada Colonization Association, subsidiary of the Department of Colonization and Development, Canadian Pacific Railway. Mr. Wilson is also a director of the Canadian Pacific and over a dozen other outstanding progressive Canadian organizations.

## Dr. Mayo Praises Canadian Brains

Pays Tribute To High Mentality Found In Dominion

Canadian affairs may feel the influence of a billion dollars of American capital, but American affairs feel the influence of \$10,000,000,000 worth of Canadian brains. Dr. William Mayo, of the Mayo Clinic in Rochester, Minn., said in an interview at Montreal.

The doctor, accompanied by Mrs. Mayo, sailed aboard the "Duchess of Athol," for Manchester, England, to attend a convention of the British Medical Society.

"I can speak for the place Canadians have in the American medical profession," the doctor continued. "At Rochester 10 per cent. of the American Surgeons Association is Canadian. In all matters except politics, and particularly in science, the two countries are one."

"The boundary line is real as a political demarcation, and this is as it should be."

## Law and Order In N.W.T.

The maintenance of law and order in the vast regions known as the Northwest Territories of Canada is one of the important branches of the work of the Royal Canadian Mounted Police. The administration of this great area is carried on by the Northwest Territories and Yukon Branch of the Department of the Interior.

## Building Active At Calgary

With land sales to the middle of June valued at \$475,000, and with the value of building permits for the same period equal to \$4,426,007, officials were convinced that at the end of the half year period Calgary will have passed the most successful half year, as regards real estate, in its history.

## IT'S FULL OF MENACE

No. 12, Tele Jaune—165 yards, Par 3.

Many an otherwise fine score has been wrecked by this hole on the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian Western Canada Amateur Championships will be played, August 19-24, this summer. The reason is obvious by a study of the green in the upper photo and of the lay-out as shown in detail by the lower panel. Fine fields of golfers are assured for the two big events over this fine course this summer, and the dove-tailing of the Western Canada Championship with the Dominion title event, insures plenty of competitive golf for experts and dubs alike.

## A Neglected Duty

People Should See That Horses Receive Plenty Of Water

The horse is largely being superseded in the streets by the motor wagon and the car, but he still gives service to mankind in large numbers, especially in the smaller cities and towns. But there is one duty to him which is badly neglected and which should be attended to wherever practicable.

That is the provision of drinking accommodation in hot weather.

There is a general and deplorable lack of drinking facilities for horses in almost every small city, and this humane provision should be seen to. Humane societies have many calls on their funds in the direction of prevention of cruelty work. A body of public-spirited citizens ought to be found in every community prepared to act if the local authority does not accept drinking fountains for horses as one of its civic obligations.

Failing that, drivers should occasionally get a pail of water when they stop for deliveries and offer the horse a drink.

That is one of the least, but one of the most necessary, services that man can do for a four-footed servant.

## Occupation That Is Dangerous

Sailors On Great Lakes Frequently Battle Heavy Storms

Sitting by the river and lazily watching the Great Lakes freighters sailing placidly by, the average person does not always think of the hardness and bravery of the men who man the ships. It seems an attractive life to the one who is not a sailor.

But life is not altogether sweet for the sailors of these lakes. There is an existence of danger and trial. Storms at sea are usually associated with ocean liners. Yet tempests frequently bring grave danger in their wake bringing whip the waters of the Great Lakes into seething cauldrons. When that happens, the crews of the giant freighters have their work cut out for them. Their life instantly becomes a battle for very existence—existence, not only for themselves but for all their comrades on their own ship, and often for those on other craft, who have been endangered by damage to their boat.

## Invents Egg Saw

Burned fingers and stained clothing will be a thing of the past when every breakfast table is equipped with the saw for boiled eggs recently invented by a chef of Park St. believes the inventor. The device is round. Just fit it over the dome of the hen fruit, squeeze the levers, and the circular saw snips off the dome neatly and quickly.

## Banff's Famous Springs

The waters of the Sulphur Hot Springs at Banff, in Banff National Park, Alberta, are of great medicinal value and are very similar in composition to the waters at Bath, England.

## Two Principal Methods Of Canning

One-Period Cold Pack and the Fractional Or Intermittent Method

The one-period cold-pack method is as called because the uncooked or partly cooked food is packed into jars and covered with some liquid, such as syrup or water, and both the jar and its contents are heated simultaneously by boiling water or steam. This method may be used for all fruits and vegetables and is recommended for home use. It is a very simple process and completely sterilizes inasmuch as the product is placed in the sterilized jars which are closed during the cooking process so that the organisms are killed and access by any bacteria from the air and other outside sources is rendered impossible. The appearance of the finished product is superior as the berry or slice remains intact. There is no crushing. The flavor, color and texture are more natural.

Another method, described in Bulletin No. 77 "Preserving Fruits and Vegetables in the Home," obtainable from the Publications Branch of the Department of Agriculture, at Ottawa, is the fractional or intermittent method, which involves the carrying on of the sterilization period for three successive days. This is used in the case of vegetables which are so strictly fresh, and is especially applicable and desirable for those vegetables lacking acid, such as peas, corn and beans. It is more thorough as regards sterilization than the one-day process owing to the fact that vegetables which may develop after the earlier sterilization, are bound to succumb during the successive periods of sterilization, but the intermittent sterilization involves considerably more handling than is necessary in the one-day method; also more fuel is consumed.

## The Chinchilla Rabbit

Standard Of Registration Is Set By Canadian Small Breeds Association

Of the many breeds of rabbits that are bred for their fur, the chinchilla is perhaps the most valuable. According to Bulletin No. 28, of the Department of Agriculture, at Ottawa, on "Rabbits," the chinchilla originated in France about fifteen years ago. Since then it has spread to Great Britain, the United States, Canada, and many other countries. The standard of registration set up for the fancy chinchilla by the Canadian Small Breeds Association, given the colour as resembling the wild chinchilla, with an under-colour of slate blue at the base, intermediate portion pearl grey, merging into dark grey and black, then white, and finally tipped with black. The weight is 6 to 7 pounds for does, and 5 to 6½ for bucks. Other qualifications are described in the pamphlet, which treats of housing, feeding, breeding, and marketing the carcasses and skins.

## Serves No Good Purpose

Nothing In Particular To Be Gained By Trans-Atlantic Flight

No one has yet been able to explain what good purpose these trans-Atlantic flights serve. There is nothing new in the idea. The trip has been made by a number of planes and lighter-than-air machines. Every successful pilot reports a gruelling experience with the chances all against success, all the way. No government regulation, of course, can stop such flights. If aviators and would-be aviators want to keep on taking chances, there is probably nothing that officialdom can do about it.—Border City Star.

## No Argument

The Labor heckler at a Festinating Liberal meeting was very persistent. "You say you are a Liberal because your great-grandfather, grandfather and father were Liberals?" he asked the candidate. "Then, if your great-grandfather, your grandfather and your father were fools, what would you be?"

"Labor!" murmured the candidate sweetly.

And silence reigned.

## Japan's Big Problem

Japan, with a larger population than the British Isles, has a much smaller area of land which can be cultivated. Consequently, she is having difficulty in feeding her people. She imports ten to twenty million bushels of rice yearly.

Mrs. MacTavish: Sandy, there's company at the door!

Mr. MacTavish: Quick! Grab a toothpick!

The name Dixie is derived from the Mason and Dixon line.

## Huge Seaplane Is a Marvel

German Company Has Kept Construction a Close Secret

The largest heavier-than-air machine ever built—a mighty 12-motored seaplane—was put on exhibition at Friedrichshafen, preparatory to test flights which may herald an amazing new step in the progress of aviation. It is built to carry 112 persons.

The seaplane was built secretly at the Dornier works on the shores of Lake Constance, and rumors of the great size and power only recently reached the public.

The craft has three decks and 12 motors. Each engine is capable of 500 horsepower.

The plane itself is approximately 150 feet long with a wing span still greater—about 160 feet.

The builder of the craft claims it will develop a maximum speed of about 155 miles per hour and a normal cruising speed of 115 miles per hour.

The plane has quarters for 100 passengers and a crew of 12 men. In addition there is fuel capacity for a flight of about 625 miles with a 50 per cent. reserve fuel range, making the maximum cruising range almost 1,000 miles.

The lower deck of the big plane has space for fuel, baggage and sleeping quarters for the crew. The middle deck is for the well-fitted passenger cabins and a luxurious lounge.

The engine and radio rooms and the pilot's quarters are on the upper or third deck of the seaplane. The motors of the plane will be controlled indirectly from the pilot's room.

The plane has been under construction for many months, the Dornier Company having kept its work secret in order to make the craft as nearly perfect as possible.

## Plea For Trees

Value Of Trees Cannot Be Reckoned In Dollars and Cents

The value of a tree was recently made known by an eminent entomologist, who reports that 50 fair-sized elms were recently sold at \$5,000 apiece and that many are worth \$10,000 each. A tree not only has a cash value, but it also possesses a worth that cannot be reckoned in dollars and cents. It is a very simple matter to plant a tree and it is equally simple to foster its growth. If every property owner made it a point to plant a tree on available space and refrained from the ruthless destruction of those already well grown, much would be done towards eliminating the follies of promiscuous and thoughtless destruction.—Kitchener Daily Record.

## Indians Are Exempt From Motor Laws

Vancouver Island Boards Of Trade Discover Unusual Situation

There are no responsibilities to cramp the style of the carefree native Indian when he is driving an automobile. It was also through a resolution down for discussion on the agenda of the Associated Boards of Trade of Vancouver Island, in convention there.

The Indian is not legally responsible for any damage he might do while driving, so the Malahat Board of Trade suggests the attorney-general be asked to introduce legislation making it compulsory for Indians to take out third-party insurance policies.

## Just Another Cat

She was taking her terrier for a run in the park and met her dearest enemy, who was wearing a wonderful new fur coat.

The little dog jumped up to greet the wearer, who cried, "Down! Down!" in an angry voice.

"Forgive my pet, darling," said his owner. "I can't teach him not to chase cats."

Guest (to waiter)—I've lost a half dollar somewhere on the floor. If you find it you may give it to me; otherwise you may keep it yourself.

"What are you doing here?"

"Is there any harm in my waiting for my bus?"—Hummel, Hamburg.

# Building of Bay Line May Be But Start of Railway Development in Rich Mineral Districts of North

The golden spike that will be driven next month in commemoration of the completion of the Hudson Bay Railway inspires a vision of future practicalities in Sir Henry Thornton of the Canadian National Railways, in an article in the Saturday Evening Post. He paints a picture of contrasts. He looks back upon the setbacks:

"For years the line lay uncompleted, eroding, its roadbed sunk so deep in places that the rails jolted forth like steel tentacles. Men have fought blizzards, loneliness, the rigors of sub-Arctic winter to complete it, that there may be a new outlet to Europe, entailing a shorter rail haul, and, strangely enough, a shorter ocean voyage than from any other port on the continent. It is a land of Eskimos and pioneers now."

But what does Sir Henry see planned to the northland when that golden spike is driven?

"I believe there may be a time when great hotels will rear themselves at Fort Churchill, the terminus, to accommodate the tourists who have sailed up the eastern coast, along the fringes of Labrador and through Hudson Strait; then on down through a bay that was once the roving ground of that romantic aggregation known as the Gentlemen of Adventure; at last to disembark and proceed home with the every comfort of most civilized travel."

The Hudson Bay line will be given a terminus at Churchill, but that will not be the end of the railway. "A railroad," says Sir Henry, "is never finished." It has to grow with the development it starts. Who dare predict the scope of the development that will gather wings to put to flight the little sweep that, already, has proved the northland to be a region of riches? What has been revealed before the golden spike has been driven is barely a lifting of the curtain upon the great drama that will be played in the vast hinterland of Manitoba. Other prospects will be denied their railroad accommodation. The terminus of next month will become the junction of many lines. "A railroad is never finished."

"The Hudson Bay line proves that," says Sir Henry. "For years people discussed whether the road could live, once it were built. There was the problem of whether the grain haulage would be sufficient for revenue. Now the road has been built and it can live if it never hauls a sack of grain. One of the great mineral fields of the world is up there; smelters are rising, water-power is being harnessed, millions are pouring into the country."

Driving the golden spike will not finish the Hudson Bay line. It will be the birth of the railroad that so practical a railroader as Sir Henry Thornton says is never finished.—Manitoba Free Press.

## Fish Meal Industry

Produced 14,000 Tons Of This Commodity Last Year

Last year British Columbia produced 14,000 tons of fish meal of which 1,000 tons were used in British Columbia for poultry feed. Seven thousand tons were exported to Germany, for dairy cattle feed chiefly; other exports were to California for poultry feed. The first exports of fish meal from British Columbia were to Japan, the product being used as a fertilizer.

The total annual receipts of building societies in Great Britain are more than \$500,000,000.

There are 85 known varieties of goldenrod.

"I suppose you will soon be married, Giles?"

"Not just yet. Marie's pig is not fat enough yet." — Lucille Sachse, Lelpig.

## Farmers Help Themselves

Establishing Grain Industry On a Sound Economic Basis

"While much is said in regard to the rapid development of Canadian industries, very few people at the present time realize the tremendous efforts the farmers of Western Canada are making to establish the industry of grain growing on a sound economic basis and under full control of the growers themselves," says an article in the "Vancouver Sun" of June 18, 1929. "Every move made by the Pool is based on sound business principles, the object being to secure for the grain grower the last possible cent for his grain. The idea behind the Pool is centralized and continuous control of the grain delivered to the organization, which amounts to over half the total delivered to country elevators, and the members are devoted to the Pool, as they look upon it as being their sole hope of achieving a place in the scheme of things to which their toil entitles them."

## TRIM WASH FROCK

You'll find Design No. 166 a most attractive, comfortable dress for mornings or home wear. It follows simple straight lines with front of skirt plaited to form a panel to lengthen the silhouette. The short kimono sleeves have turn-back cuffs; square neckline is finished with shawl collar that affects a deep V at front. Printed pique in yellow and white, Nile green, linen, cotton foulard in white with blue polka-dots, gingham check in brown and white, and white cotton basket weave in orchid prints are becoming fabrics to select. Pattern in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust measure. For the 36-inch size 2 1/2 yards of 40-inch material with 1/2 yard of 36-inch contrasting is sufficient. Price 25 cents in stamps or coin (coin preferred).

## British Columbia Tobacco

The B.C. Provincial Government has secured fifty pounds of white burley tobacco grown in the Vernon district and will blend it with the Sumas product. The mixture is to be placed on the market to test the commercial suitability of British Columbia tobacco.

The upas tree has a poisonous juice.

## Cost Of Rearing Draft Horses

Record Kept Of Cost Of Raising Thirteen Percheron Colts

One of the big problems that the farmers of many provinces will have to face for at least some years to come, is where the necessary draft horses may be purchased. Will they be good horses and the kind desired? How much will they cost?

With the object of throwing light on this question, cost studies have been made at the Ste. Anne de la Poudre Experimental Station since 1921. From that year to 1926, thirteen Percheron colts were raised to the age of two and one-half years. The weights of the colts, food consumed, and cost for each colt, was tabulated.

To grow these colts to working age, an average of 4,921 pounds of bran, 3,664 pounds of oats, 990 pounds of hay, and 7.7 months of pasture was required, at an average cost of \$116.37 per colt, weighing 1,517 pounds.

No mention is made of the service fee as this varies with the station used and district, nor has any charge been made of the mares having nursed these colts. At this station, as at many farms where colts are raised, the mares, as a rule, are, before giving birth to the colts, and after weaning, worked more than necessary to pay for their upkeep during the year. From the figures given above on the feed consumed by the thirteen colts reared in this five-year period, it will be seen that the average cost is 40 per cent. below the cost of draft horses of similar qualifications and weight in the open market. These experiments and many others appear in the annual reports of the experimental farms and stations, which may be had on application to the Publications Branch of the Department of Agriculture, at Ottawa.

## Seven Cents For Cheese

Was Considered Good Price Half a Century Ago

A cheese factory account book of 1879, just half a century ago, is in the possession of Walter Strike, of Cherry Valley, Ont. It shows that the highest price received for cheese that year was seven cents. For the month of July, patrons received 33 cents per one hundred pounds of milk, just enough to buy the present-day farmer a gallon of gas to run his car.

## To Discuss Young Plan

The conference to discuss the Young plan for settlement of the reparations problem, it is understood, will open August 6. No decision has yet been made as to the place of meeting.

## Critiques History Books

Says Canada's Part In The Great War Passed Over Lightly In Text Books

Public school history text books which have been adopted in several provinces of Canada, contain "19 words devoted to the part Canada played in the Great War," stated Dr. J. L. McDougall, formerly of Regina, Sask., now of Vancouver, B.C., national vice-president of the Institute of Canada, in the course of an address before the eighth annual convention of that organization at Winnipeg.

"Such a condition of affairs in the education of our children is a colossal shame and national disgrace," he declared. "The text books were published in the United States and edited in the United States by Americans, said Dr. McDougall. Educational authorities, when asked for an explanation, had replied "that at the present time there is no one adequately equipped and willing to take the time to edit such a history," the speaker said.

## Saskatoon Cattle Show

Breeders Well Satisfied With Prices That Prevailed

At the recent Saskatoon Cattle Show and Sale, good average prices were paid for bulls, thirty-eight head of Shorthorn bulls averaging \$170. Fifteen head of Shorthorn females averaged \$114, four Aberdeen Angus bulls averaged \$155, three Hereford bulls averaged \$178, and an aged Holstein bull sold for \$110. Quite a number of bulls, including both the champion Aberdeen Angus and the champion Hereford were bought by Saskatchewan Live Stock Branch, the buying being attended to by the Live Stock Commissioner. Many of the bulls were quite young but the breeders were well satisfied with the prices that prevailed.

## Medicine Hat Air Port

Arrangements are under way to have an air port in Medicine Hat, said Dr. Gershaw, M.P., who recently returned from Ottawa where he has taken an active interest in the project. He understood that the line would link up Calgary and Medicine Hat, Regina and Moose Jaw with Medicine Hat.

## Canada's Mica Output

Practically all of the mica produced in Canada is of the amber variety (phlogopite). Mines in the Ottawa region, both in Ontario and Quebec, are the principal producers.

Cuba's most ancient city, Baracoa, is to be improved and embellished after hundreds of years of neglect.

# National Research Council Will Endeavor To Solve Many Economic Problems

## Rust Resisting Wheat

Three Varieties Of Wheat Which Will Withstand All Known Kinds of Rust

Two or three varieties of wheat which will resist rust have been developed by the department of agriculture, it was stated by Dr. J. H. Grisdale, deputy minister of the department. The experiments have been conducted for some years, but the stage has now been reached when it can be stated with considerable assurance that success is near at hand.

"Our experiments this year confirm the earlier prospects," said Dr. Grisdale. "No names have yet been given the new varieties and it will be two or three years before they can be produced in sufficient quantities for seed distribution, but we feel confident that we have the kind now that will resist the known varieties of rust. It is to be remembered, however, that one rust will cross another and evolve a new kind, but the wheat grades discarded by careful research withstand them all. The annual damage done by rust is enormous, so the evolution of a wheat which will be unaffected by it is of incalculable advantage. In rust research we claim to lead the world."

## Has Faith In Alberta's Gas Fields

Engineer From Buffalo Predicts Province On Eve Of Great Development

H. R. Davis, an engineer of Buffalo, N.Y., who has recently been making an inspection of the oil and gas fields in Alberta and Saskatchewan, predicts that the former is on the eve of a great development in natural gas production. He states that he is convinced that the surface has only been scratched, and that in the near future there will be an enormous development in the production of gas.

## Origin Of The Word "Humbung"

Few people who use the word "humbung" so glibly, realize that it is a corruption of the name of a well-known German port. But years ago, when wars were common on the continent, so many false reports came from Hamburg that people used to say sceptically, "That is Hamburg?" So "Hamburg" became corrupted into "humbung."

Lavas rarely flow as much as a mile an hour.

Waste gas from Alberta's oil fields, loss from fermentation and other problems of the Canadian honey industry and "the iodine content, and control of iodized salts in Canada," will be investigated by the National Research Council. Decisions to undertake this new work, in addition to the 100 or more other problems now under investigation, were made at a council meeting here.

All parties actively engaged in seeking a solution of the Alberta gas problem, which includes a wastage of 100,000,000 cubic feet per day, will be represented on the associate committee of the council that will probably hold its first meeting in Edmonton early in October. Dr. Chas. C. Macdonald, deputy minister and other representatives from the Dominion Department of Mines; Dr. G. S. Whitby, professor of chemistry at McGill University; representatives of the University of Alberta, who have given considerable study to the situation and Dr. H. M. Tory, chairman of the National Council, will be included in the personnel.

Work on honey has already been started in co-operation with the Dominion Department of Agriculture at the request of the industry and will be further advanced by an associate committee appointed at the meeting.

Iodine in salt was brought to the attention of the council by the Canadian Chemical Association, and the Canadian Medical Association, the declaration of the former being that "it is not yet certain that the indeterminate use of iodized salt is generally beneficial to public health. Sums aggregating \$25,000 were granted at the meeting to aid research projects in Canadian universities. The largest sum went to Professor T. Thorvaldson, of the University of Saskatchewan, who for six years, has conducted an exhaustive study of the effects of alkali water on cement and concrete. A grant was made to Professor E. F. Burton, of the University of Toronto, for the purpose of developing his new method of determining moisture content of wheat, wood and other products. A grant of \$2,500 was made to Professor E. H. Bousquet, of the University of Alberta, that he might continue his work on the economical utilization of natural gas. Color vision, generation of electricity, using the windmill as prime mover, internal parasites of sheep, swine and poultry, design of steel columns and struts for buildings and bridges, blood pressure reactions and the spectra of helium were included in the researches aided.

## British Columbia Bulbs

Sent To England To Be Planted In Old Country Parks

British Columbia bulbs, believed to be the equal to the best grown in Europe, will be planted in the public parks of England to encourage their importation into the Old Country, said Premier Tominie, the other day. He added that Sir William Clark, British High Commissioner in Canada, was much impressed with British Columbia flowers when on his recent visit and had suggested to the Lieutenant-Governor, that British Columbia bulbs might be exported to Britain to be planted, and labelled, in the public parks.

## Growing Up Of Water Power

The steady growth in the use of water power in Canada is shown by the facts that the average annual rate of increase in development since 1925 has been 10.7 per cent. and that the total development now amounts to 5554 installed turbine horse-power per 1,000 of population.

Close to 35,000 persons are employed in road construction in Canada each year.

"What has happened?"

"The cat scratched me."

"But what about all those wounds on your head?"

"Oh, first of all she threw the soup tureen at me."—Bequella, Barcelona.

# Riding on the Roof of the Rockies

Among the most spectacular of the Trail Rides ever attempted in the Canadian Rockies will be the one proposed to start August 8, and lasting 18 days, to take in a long distance ride to the Columbia Icefield from Lake Louise. This icefield is the largest body of glacial ice left on the North American continent, covering 150 square miles and surrounded by peaks from ten to twelve thousand feet in height. The ride will be from Lake Louise up the Bow Valley to Bow Lake, over Bow Pass

and by the Mistaya Valley past Waterville Lakes to the North Saskatchewan River, then up the Alexandra River Valley to Castleguard and the Columbia Icefield. Only Trail Riders holding at least the silver button, emblematic of completion of 100 miles of trail riding, will be permitted to join the expedition, since all taking part must satisfy the committee that they will not prove a burden to the rest of the party.

For less experienced Trail Riders,

or those who cannot spare the time, there will be a four-day ride starting from Banff August 1, and ending at Castle Mountain Bungalow Camp. It will take in the Egypt Lake district, which will be accessible for the first time this summer, so that those participating in this ride may regard themselves as pioneers. Beautiful Shadow Lake under Mount Ball will be the camp site of the riders on the second day out, and, in all, seven glacier-fed lakes will be on the route of the trail.

WORLD HAPPENINGS  
BRIEFLY TOLD

Negotiations between representatives of the German and Belgian governments for settlement of the long-pending market questions have been concluded and an agreement has been signed.

The first loans issued in British Columbia under the Canadian farm loan scheme, and it is believed the first issued in Canada, have been made through the provincial loan board.

Peping's "hello boys" went on strike because their wages were not paid on time. They did not stop work, but staged a "go slow" strike, carrying on their duties in leisurely fashion, and inconveniencing patrons.

Two United States fishing vessels seized by the Canadian Government Fisheries Protection steamer "Malaspina," at Goose Harbor, 100 miles south of Prince Rupert, recently were released by Mr. Justice Martin in the Admiralty Division Court.

The much debated revised prayer book of the Church of England will likely be discussed in the British House of Commons again following its endorsement by the bishops assembled in the convocation of Canterbury and York recently.

Dr. Frank L. McKinnon, well known in the medical profession, died at Winnipeg recently after a brief illness. During the war he served for four years in Mesopotamia and was decorated with the Military Cross.

World automobile production increased by more than 1,000,000 vehicles in 1928, as compared with 1927, and set a new record total output for the industry, according to a report of the U.S. Department of Commerce. In 1928, Canada produced 242,382 cars, as compared with 179,054 in 1927.

Aaron Sapir, famous co-operative marketing expert from the United States, will again tour Saskatchewan this summer in the interest of a 100 per cent. membership for the Wheat Pool. The tour will start the latter part of August, according to a brief telegraphic dispatch recently. Mr. Sapir's voice broke down during a recent tour of the West.

## Growth Of Co-Operation

**Catching The Vision Of Things That Might and Can Be Done**

"Co-operation is a growth and a way of living. Each day a larger and larger number of men and women awaken to the full significance of the truth that no man can live unto himself. There are still those, even in this young country, where progress is second nature, who have not been awakened. They have not yet caught the vision of things as they might and can be. They simply do not understand, and we must not become impatient even with these backward members of society."—A. J. McPhail, President of Saskatchewan Wheat Pool.

The minimum resistance to the forward motion of the wings of an airplane is obtained with a thin wing which has a low lifting capacity.

A Severe Attack of  
Dysentery  
Checked by 4 Doses

Mr. I. Burtonwood, 620-22nd St. W., Saskatoon, Sask., writes:—"My child, when only seven months old, had a very severe attack of dysentery, and after three days' treatment with other things we decided to use Dr. Fowler's Wild Strawberry."

On this day his bowels had moved twenty-three times in eleven hours but four doses checked it.

"A short time ago we offered it to a neighbor whose baby was troubled, and it too was relieved within thirty hours."

"We both always keep a bottle of Dr. Fowler's handy at all times. This medicine has been on the market for over 50 years; put up only by The T. T. Millburn Co., Ltd., Toronto, Ont."

W. N. U. 1795

## Japan Favors Canadian Wheat

Wheat From Dominion Has Supplanted U.S. Freedom In Japanese Market

Quality and price are the factors which have enabled Canadian wheat to completely supplant the United States produce in the Japanese market, declares Tetsuichi Shoda, president of the Nishin Flour Mills Company, Limited, who was in Vancouver in the course of a trip of inspection which will take him to the wheat centres of Canada, United States and Europe.

The company which Mr. Shoda heads imports an average of 250,000 tons of Canadian wheat annually. It is all shipped through Vancouver. Mr. Shoda has been in the milling business for thirty years and operates 12 flour mills in all parts of Japan with a combined capacity of 25,000 barrels per day.

Manchurian wheat offers no serious prospect as a possible rival for Canadian wheat in the Japanese market, according to Mr. Shoda, on account of the uncertainty of deliveries, lack of handling facilities and absence of organized grading.

"Last North" Is Prosperous

Canada's "Last North," the great Peace River Country, is fast being settled and promises to have a very prosperous crop season this year, says Dr. W. J. Black, Director of Colonization and Agriculture, of the Canadian National Railways, who has returned from a tour of the territory.

The course of true love never runs smooth, and in later years the bachelor is often glad of it.

Rubber jewelry is the latest fad. We wonder if wedding rings will carry a no-blowout guarantee.

## CAPTURES CHAMPIONSHIP

Helen Wills, who won the women's single championship at Wimbledon, England, defeating Helen Jacobs, her fellow Californian, in straight sets, 6-1, 6-2.

## Cross Crossings Cautiously

National System Starts Drive To

Combat Level Crossing Accidents

As a further effort in the campaign to reduce crossing accidents, the Canadian National Railways, through the Director of Safety, W. A. Booth, have distributed two thousand copies of a special card which is an appeal to motorists, and others, to "Cross Crossings Cautiously." These posters are being sent out from the headquarters of the three regions in Canada, at Moncton, Toronto, and Winnipeg. Atlantic Central and Western, respectively, so that every Canadian National grade crossing in the Dominion will be marked. The instructions are to place these posters on poles close to the railway crossings and on the right hand side of approach.

In the letter of instructions it is stated "The time is now opportune when aggressive methods must be taken to combat the increasing number of highway accidents."

## Abolish Corporal Punishment

Juvenile Offenders In Britain May Escape Birch Rod

Youthful law-breakers in England will no longer have to fear the birch rod if a movement to abolish corporal punishment for young offenders is successful. W. Clarke Hall, London police court judge, explained his opposition to the widespread practice of "birching" at a conference of 70 judges and presented a report showing that 80 per cent. of the boys who had been whipped in a certain court came back again charged with similar offences.

## Prosperity Reflected

Marked Growth Is Evidenced On All Sides In City Of Regina

In a booklet issued by the Regina Board of Trade, dealing with statistics of the city as revised on June 1st, marked growth is seen on all sides in the capital of the province. Building permits for the first five months of the year reached a total of \$4,399,772 as compared with \$1,300,855 for the corresponding period of 1928, while bank clearings, postal revenue and other such indices to prosperity all reflect prosperity and expansion.

## Registered Seed

It is hoped to have the plant of the Saskatchewan Registered Seed Growers' Limited, on South Hill, Moose Jaw, ready to handle the registered seed from the 1929 crop. This follows the passing of estimates in the House of Commons, on behalf of the Department of Agriculture, of \$150,000 for the seed cleaning plant and warehouse at Moose Jaw.

## The Columbia Ice Field

The melting waters from the Columbia Ice Field in Jasper National Park, Alberta, feed the sources of three historic rivers in the Canadian west, the Athabasca, the Saskatchewan, and the Columbia, which flow to three separate oceans.

More than half the arable land in Japan is in rice.

Most of the bacon eaten in Britain is imported from Denmark.

## SUNDAY SCHOOL LESSON

JULY 28

## THE STORY OF DANIEL

**Golden Text:**—They that are wise shall shine as the brightness of the firmament; and they that turn many to righteousness as the stars for ever and ever.—Daniel 12:3.

**Lesson:** Daniel 1:1-21; 2:13-19; 4:19; 7:28; 8:15-18; 9: 20-23; 10:1-19; 12:1-6.

**Devotional Reading:** Psalm 46.

## Explanations and Comments

**The First Captives Taken To Babylon.** 1:1, 2.—It was in the third year of Jehoiakim's reign, 606 B.C., that Nebuchadnezzar, King of Babylon, first besieged Jerusalem and carried back with him to the land of Shinar (the old name of Babylon; Gen. 10:10), Jewish captives, together with some of the treasures of the temple which he then had placed in the treasure-house of his god Marduk. Among the captives were Daniel and three other youths of our lesson. Daniel belonged to a family of high rank in Jerusalem, and, according to Jerome, was at this time only a boy.

**The Training Of Daniel And His Companions In Babylon.** verses 3-7. Nebuchadnezzar directed Ashpenaz the master of his captives, to teach the Jewish youths of noble birth who were especially fair and bright and wise, and were therefore potential candidates for official positions, and teach them the language and wisdom of the Chaldeans. The king also directed that the youths were to be nourished with a portion of the food and wine which were prepared for himself. After three years they were to become his attendants.

Among the youths selected were Daniel and three companions, Hananiah, Mishael, and Azariah. Daniel's name meant "God is Judge"; Hananiah's, "Jehovah is gracious"; Mishael's, "Who is what God is"; and Azariah's, "Jehovah has helped." Ashpenaz called them instead Belshazzar, Shadrach, Meshach, and Abed-nego, giving them names which, it is thought, had reference to Babylonian deities.

## For First Offenders

Attorney-General Of Ontario In

Favor Of More Frequent

Suspending Sentence

The Attorney-General of Ontario, Hon. W. H. Price, would enlist the sympathy of judges and others in favor of more frequent suspending sentence with a marked warning. After a long and varied experience it is his opinion that lives are frequently wrecked by court sentences for offences against the laws that are really not very serious in character. It is undoubtedly true that once a boy or man has the stigma of conviction against him he is badly handicapped in the race of life. Mercy is not being asked for those hardened in crime, but for those who have committed their first fault. One cannot but sympathize with the idea.

A woman first sheds a few tears, and then proceeds to open the telegram.

A spool of thread was unknown 125 years ago.

Michigan has by far the greatest coast line of any state.

No jumpy feeling  
NOW when I drive  
through  
traffic

Nothing relieves tension so effectively as Wrigley's. The act of chewing, as motorists have discovered, has a gentle soothing effect. The beautiful cleansing action of Wrigley's refreshes the mouth and steadies the nerves.

## Judgment Is Reserved

Privy Council Withholds Decision On Dominion Fisheries Act

The judicial committee of the Privy Council reserved judgment on the appeal of the Dominion of Canada from a ruling of the Canadian Supreme Court which held that sections 7a and 18 of the Canadian Fisheries Act of 1914, were ultra vires of the Dominion parliament.

The important point at issue is whether under the British North America Act which gives it power to legislate "on seacoast and inland fisheries" the Dominion parliament can set up a system of licensing of fish canneries as it sought to do under the sections of the fisheries act.

The provinces of British Columbia, Quebec and Ontario, are respondents in the action as well as British Columbia fishermen of Japanese origin.

## Towns Form Boards Of Trade

"There is no better evidence of faith in a district than the example of its business men forming a Board of Trade to advance the welfare," says the Edmonton "Chamber of Commerce News." "During the last month, boards have been organized at the following towns: Thorhild, (R. Baker, Secretary); Kinuso, (C. T. Field, Secretary); and Slave Lake (A. Peart, Secretary)."

## Record Of Fire Losses

Fire losses in Canada during the week ended July 10, 1929, are estimated by "The Monetary Times" at \$239,500, as compared with \$139,200 for the previous week, and with \$264,750 for the corresponding week of last year. From January 1, 1928, to June 30, 1929, the total losses totalled \$11,355,960, and from January 1, 1929, to July 10, 1929, they were \$12,976,250.

More than 1,350 shocks were felt during the Japanese earthquake of 1923, which took a toll of 200,000 lives.

WINDOLITE The Improved  
Glass Substitute

## COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that it uses no material that is harmful to the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light hit strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold, will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 oz., while a square yard of glass of ordinary thickness, weighs about 185 to 190 oz. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, F.o.b., Toronto.

## The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

### SYNOPSIS

Marcus, the famous Broadway producer, heads a party of four that visit Blackie Joe's night club in downtown New York. Al Stone, Blackie's chief comedian and singing waiter, begs Molly, the ballad singer, to render a love song he has just written for her. Molly is disdainful and refuses even to read the song. Al is in love with her but she tells him harshly that she will never marry a waiter. Then she leaves her dressing room and goes to the Marcus table, trying to ingratiate herself with the famous producer. Al is in despair. Grace, the cigarette girl, who loves Al and wants to see him happy, asks him what is the matter.

### CHAPTER V.

"Nothing's the matter, kid," said Al, making a show of throwing off his depression. But his wan smile belied his words.

Grace gazed hopefully up into his face. Her expression said plainly that if he would only confide in her she was sure she could help him.

Slowly he studied her young, sensitive features. She was an awfully sweet kid, undoubtedly, and he liked her, but—

At that moment someone else arrived to interrupt his thoughts. Blackie, all excitement, entered the corridor calling out:

"Get ready Al—you're on next!" Al turned back-lustre eyes toward Blackie. Then, suddenly, a plan that had been forming vaguely in his mind ever since Molly's harsh exit, took definite shape. He drew himself up and said quietly:

"Blackie, I'm quitting tonight." Blackie retreated a step as if he had been struck, while a little cry of amazement escaped Grace. Her hand went to her mouth in a quick gesture of apprehension. Blackie was the first to recover himself.

"Don't be a fool, Al," he said earnestly, putting a hand on his singing waiter's shoulder. "You've got a good job here and a following among the customers. You can't quit off-hand like this—why, it wouldn't be fair to me or to yourself."

Al nodded slowly. Yes, he had thought of that. But there were other things to be considered.

"You won't miss me," he suggested.

Molly and you feel it. If you go out there and forget yourself, and sing it at her, you can make her feel it. Take a chance—they can't kill you. If the song goes over she'll understand for the first time how you really feel about her. Look what you stand to win!"

Al stared into the earnest eyes of Blackie, almost convinced. Could he do it, could he put the same feeling into his singing that had possessed him when he wrote the song? If he could he might be able to touch Molly's heart, as Blackie suggested.

Little Grace watched anxiously the play of expression on Al's face. She saw clearly what Blackie was driving at before Al saw it, and she hoped desperately that he could prevail on Al to try the song. If the words touched Molly's heart at least she would be happy, which would make Grace happy.

"To do it," he said finally, with a gesture of decision. "I'll show her I'm something better than a waiter. I'll put everything I have into that song!"

Blackie wrung his hand. "Go to it, boy," he said enthusiastically. "You'd better make your entrance as soon as you can—while you're in the mood. Meanwhile, I'll see how the show's going."

When Blackie disappeared Grace also vanished down the corridor. But as Al came out into the main room a moment later he heard his name called. Grace slipped over to his side, looked up into his face with a forced, wistful smile and whispered:

"I'll be rooting for you, Al!"

"Will you, kid? Say, I appreciate it."

As he raised his hand, patting her lightly on the cheek, as he would have caressed a sister. He noticed that her cheek was too warm, but he thought it was merely from excitement.

As he turned nervously away Grace raised her hand to her face, where his hand had rested for only a too brief moment. The spot was burning. She saw him move lightly across the room and approach the pianist to give him the new music. The pianist's mouth opened in astonishment at the idea of Al Stone, the comic, singing a heart song. Then Grace saw the man she loved pass by for another woman. Would he put it over?

(To Be Continued.)

### The Newest Discovery

American Chemical Society Told Gasoline Can Be Made From

Gasoline made from trees is announced in a report to the American Chemical Society by Dr. Jacques C. Morrell and Dr. Gustav Egloff of Chicago.

They have produced an anti-knock motor fuel from the tar in the Douglas fir. While this fuel now is in the laboratory stage, the report says it can be made in commercial quantities from present wood waste.

"The development of a practical and economic means of converting wood waste into motor fuels," says the report, "has a deeper significance than the immediately important factor of conservation—it provides a source of motor fuels for the future which is under the direct control of man."

"Our great storehouses of potential motor fuel from petroleum, coal and oil shales are heritages from past ages, while wood tars and other vegetables are producible under controlled conditions."

Approximately 24 per cent. of the standing tree is converted into useful products, while 76 per cent. is wasted.

### Want World Peace

A petition signed by 17,800 women voters of the district of Bolton, asking the House of Commons to use all possible efforts to secure world peace by the fullest use of the Kellogg pact and the optional clause of the compulsory arbitration agreement, has been presented to the House by Albert Law, Labor leader.

### Brick Yard For Prince Albert

It is reported that the International Clay Products Company, of Estevan, has purchased property in Prince Albert with the intention of making bricks there.

### New Invention a Success

Pittsburgh Has First Aluminum Street Car in World

Pittsburgh has the first aluminum street car in the world. This car, as either the Pittsburgh Railway Company, or the Aluminum Company of America will say, has the formal title of the new lightweight aluminum car No. 6002.

This innovation in car building made its first trip through the Southside and Southlands districts. The car is built for vision—for the passengers. It has windows without the usual paneled obstructions and those same windows can be raised or lowered at leisure with the same ease and the same sort of gadget as an automobile's.

The vehicle was built with special attention to speed, comfort and safety. The seats are form-fitting and one can recline in ease in them. The floor is a non-slip composition. The lights are subdued, arranged so as to give their rays almost directly.

### New Air Base Established

Mineral Exploration Company Will Make Headquarters At Sioux Lookout

The Northern Aerial Mineral Exploration Company have decided to make Sioux Lookout, situated on the main line of the Canadian National Railways, their headquarters for operations in the Patricia District, and they announced recently that a 200 acre camp site on the lake front has been laid out, which will be the nucleus of a modern village with all conveniences. It will contain shipways, hangars, offices, machine shops and assay office. Sioux Lookout is the scene of much activity; engineers and scouts for the chief mining concerns are establishing headquarters at this point for the season's activities. They include the Mining Corporation, Atlas Exploration, Nipissing, Huronian Belt, and Lindsay and Connell interests.

### Minard's Liniment for Neuralgia.

**Reduction In Canada's Debt**

Net Debt Of Dominion Decreased By \$92,620,133 Last Year

The net debt of the Dominion of Canada decreased by \$92,620,133 in the twelve months ended June 30 last, according to figures issued through the finance department. At the end of June, 1928, the net debt stood at \$2,944,342,450. On June 30 last, it amounted to \$2,851,722,317. During the first three months of the present fiscal year, which are covered by the statement issued recently, ordinary revenue of the Dominion showed an increase of \$13,529,162 over the corresponding period a year ago. The increase in ordinary expenditure is shown as \$501,266. The statement represents only the receipts and payments which have passed through the books of the finance department up to the last day of June.

### Fresh Supplies In Demand.

Wherever Dr. Thomas' Electric Oil has been introduced increasing supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is not impaired. It is put up in most portable shape bottles and can be carried without fear of breaking.

### Edmonton Soap Factory

It is reported that a soap factory will be opened in Edmonton shortly by United States interests and will engage about seventy-five people. J. C. Moore, Calgary, is the managing director and he is reported as stating that at present negotiations are pending for the purchase of a plant and site, also that machinery and supplies are now in transit.

### Government To Aid Berry Growers

The B.C. Government has undertaken to assist berry growers to preserve their surplus crop of the 1929 season and is advancing a loan to a company to be known as Berry Processors Limited, which will have plants at Victoria, New Westminster and Hazelton.

The up-and-coming man is pretty likely to succeed, unless he is up at four and just coming home.

### Something In Weather Cycles

Records Show Seasons Have Practically Followed Same Curve Looking back over weather records makes one believe, says an English writer, that there really may be something in the sun-spot theory of a ten-to-twelve year cycle of weather over Western Europe. There was a spell of hard winter in 1885, another in 1906, a third in 1914, and now here we are having a fourth in 1929. The summers, too, have followed more or less the same curve. But why should sun-spots affect only Western Europe? Must not the influence of the Atlantic Ocean be taken into the account?

### Rebukes Cameraman

Colonel Lindbergh Did Not Like His Dishonest Method

Col. Charles A. Lindbergh delivered a lecture at San Francisco on honesty and integrity. The colonel whose aversion to sound reels is well known, was approached by a "talkie" cameraman, who had a microphone concealed under his sweater. The flyer detected the ruse and said: "That's not honest, why didn't you approach me with the microphone in plain sight? That would be the honest thing to do." He refused to talk for the "mike," because you have not been fair in this matter."

### KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Little Helps For This Week

"The eternal God is thy refuge and underneath are the everlasting arms."—Deut. xxxiii. 27.

What though the way be rough and steep? What though we stumble as the blind? There's joy reserved for those who weep.

The everlasting arms are kind. What matters it if sorrows come? What though the night be dark and long? The darkest cloud but hides the sun; The everlasting arms are strong.

One great purpose in all affliction is to bring us down the "Everlasting Arms." What new strength and peace it gives us to feel them underneath us! We know that, far as we may have sunk, we cannot go any farther. Those mighty arms can not only hold us, they can lift us up. They can carry us along. Faith, in its essence, is simply a resting on the everlasting arms. — Theodore L. Cuyler.

MOST people rely on Aspirin to make short work of their headaches, but did you know it's just as effective in the worse pains from neuralgia or neuritis? Rheumatic pains, too. Don't suffer when Aspirin can bring such complete comfort without delay, and without harm; it does not affect the heart. In every package of Aspirin you will find proven directions with which everyone should be familiar, for they can spare much needless suffering.

**ASPIRIN**  
Aspirin is a Trademark Registered in Canada

### Canada's Day-Old Chick Industry

Number Of Chicks Sold Each Year Runs Into Millions

The baby chick industry has grown such an extent in Canada that the Department of Agriculture has taken action to safeguard the interests of the buyers of day-old birds. From a small beginning a few years ago the industry has already reached enormous proportions, and the number of chicks sold each year runs into the millions. The Department now provides a guarantee that a farmer buying chicks from an approved hatchery may rest assured that the stock from which the hatching eggs came conforms to a high standard of excellence, and that the hatchery in which the chicks were incubated was clean, sanitary, and well conducted.

### From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful! I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 22 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."

—Mrs. Milton McMillen, Vanessa, Ontario.
